Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 1 MONTH(S) FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If the period for reply specified above is less than thirty (30) days, a reply within the statutory minimum of thirty (30) days will be considered timely.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

Art Unit: 2655

In response to applicant's letter dated June 10, 2004. The following action is taken:

Restriction to one of the following inventions is required under 35 U.S.C. 121:

- I. Claims 1-20 are, drawn to a reading apparatus wherein samples data is separated into a plurality of partial portions, classified in class 369, subclass 59.21
- II. Claims 21-25 are, drawn to a record medium, classified in class 369, subclass 275.3.
- III. Claims 26-36 are, drawn to a reading having a discriminating signal indicating a processing of data with subtraction, classified in class 369, subclass 47.1.

The inventions are distinct, each from the other because:

Inventions either one of groups one or three and group two are related as combination and subcombination. Inventions in this relationship are distinct if it can be shown that (1) the combination as claimed does not require the particulars of the subcombination as claimed for patentability, and (2) that the subcombination has utility by itself or in other combinations (MPEP § 806.05(c)). In the instant case, the combination as claimed does not require the particulars of the subcombination as claimed because the medium is not required to have two different regions recording first and second sampled data. The subcombination has separate utility such as a magnetic hard disk .

Art Unit: 2655

Inventions group one and group three are related as subcombinations disclosed as usable together in a single combination. The subcombinations are distinct from each other if they are shown to be separately usable. In the instant case, invention group one has separate utility such as an apparatus that is not required to use a discriminating signal indicating a summing of subtraction data portions on the medium. See MPEP § 806.05(d).

Applicant is advised that the reply to this requirement to be complete must include an election of the invention to be examined even though the requirement be traversed (37 CFR 1.143).

Any inquiry concerning this communication should be directed to NABIL Z HINDI at telephone number (703) 308-1555.
